

DISASTER DRILL - The New Milford Fire Department participates in the Emergency Management County-wide Disaster Drill Saturday. A simulated hurricane and effects called for emergency treatment of victims due to fire and gasoline leaks. Fire departments from Dumont and other towns were called to the scene in this mutual aid practice. Above, a "victim" is saved from danger after the DPW building is "hit by lightning." Below, firefighters use foam to suppress gas from igniting and to keep fumes under the foam. (Photos by Tom Sullivan, Dennis Studio, Inc.)
